Cabuyao, Laguna, Philippines 4025

Embedded Software Engineer specializing in Linux embedded systems, C/C++, OpenWRT, RDK-B, Yocto, CI/CD automation, and SDK integration.

Work Experiences

Sercomm Philippines Incorporated - Muntinlupa, Philippines

Sep 2023 - Present

Embedded Software Engineer

- Led development of Linux-based embedded platforms, integrating vendor SDKs (Broadcom/Qualcomm), kernel modules, device trees, and hardware-specific components for production deployments.
- Built and optimized OpenWRT, RDK-B, prplOS, and Yocto build systems for large SDKs and vendor integrations.
- Designed and maintained CI/CD pipelines using Jenkins and Docker, improving build reliability and release consistency.
- Implemented Git-based workflows using Gerrit and Gitlab, ensuring code review, repository mirroring, and team collaboration.
- Provided system-level debugging and performance optimization across networking, kernel, and user-space components.
- Supported and guided coworkers on technical tasks, sharing knowledge and best practices within the team.

Education Level

Catanduanes State University – Main - Catanduanes, Philippines

Jun 2018 - Jul 2023

Bachelor of Science in Computer Engineering

- Completed undergraduate thesis: Detachable Microcontroller Based Motorcycle Helmet Device and Safety System — designed and developed a prototype safety system using sensors, GPS, GSM, and microcontroller logic to enhance motorcycle rider safety by ensuring helmet use and providing emergency alerts.

Skills, Achievements & Other Experience

- **Programming & Scripting:** C, C++, Python, Bash, Shell scripting
- **Embedded Systems & OS:** Windows, Linux, , Yocto, RDK-B, OpenWRT, prplOS
- **Build & Automation:** CI/CD pipelines (Jenkins, Docker), SDK integration, build optimization
- **Version Control & Collaboration:** Git, Gerrit, Gitlab, Gitea; code review and repository mirroring
- **Hardware & Networking:** Microcontrollers, kernel modules, device trees, hardware abstraction, embedded networking protocols
- **System Tools & Debugging:** Performance profiling, system-level debugging, cross-compilation, multithreading
- **Achievements:** Led development of production-grade Linux-based embedded platforms, integrating vendor SDKs and custom hardware components, designing scalable CI/CD and build infrastructures, and delivering production-ready firmware releases
- **Guidance & Mentorship:** Provided technical support and guidance to coworkers to improve team workflows and collaboration
- **Other Experience:** Completed undergraduate thesis Detachable Microcontroller-Based Motorcycle Helmet Device and Safety System, designing and implementing a safety system with sensors, GPS, and GSM alerts; gained internship and technical reporting experience documenting system design, testing, and evaluation
